About Disklabs Faraday Bags

Disklabs are a Cyber Forensics company, with a background in Data Recovery and Digital Forensics. In 2004, Disklabs needed to protect a mobile device from connecting to a network and developed the world's first Faraday bag with a window that allowed the forensic analyst to view the screen of the mobile device. Since then, Disklabs have been designing and developing a range of RF Shielded Faraday bag products for all needs. Choosing to work with only the best distributors globally, Disklabs

now serve markets which include, among others such as Police Forces, Intelligence Agencies, Military Units, Government Departments, C-Suite Executives, VIP's, Celebrities and Owners of High Value Vehicles.

Disklabs Faraday Bags will protect your devices from 2G, 3G, 4G, 5G, Bluetooth, GPS and WiFi, (2.5Ghz and 5Ghz).

Protecting Your Digital Life.

Your Distributor

DataProtect deliver security in a holistic perspective. We target the Nordic countries with our product and services and we always prioritize the customer requirements. Our customers are within governments, authorities, military and commercial companies with high security demands.

Key Shield

Blocks all signals to and from remote key fobs. This prevents a common Relay Theft hack of your vehicle.

Key Shield

KS1

 10cm x 10cm	 N/A
 11.5cm x 11.5cm	 N/A
 17cm (Open)	 40g

The KS1 is a windowless bag that can secure key-less car entry fobs or other small devices up to 10cm x 10cm in size.

Key Shield Home

KSH

 14cm x 24cm	 N/A
 17cm x 25cm	 N/A
 31cm (Open)	 100g

The KS1H is a stylish bag designed for the home user to store keyless car entry fobs or small devices up to 14cmx24cm. This is also large enough to secure an iPad Mini.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask you distributor for more details* (subject to quantity).

Ensure you're not tracked.

Ensure you can't be disturbed in sensitive meetings or conferences.

ID Shield

ID1

	11cm x 15cm		N/A
	12.5cm x 17cm		N/A
	22.5cm (Open)		55g

The ID1 is a windowless bag with a windowed pouch allowing a mobile phone and passport to be secured whilst allowing the ID Card in the pouch to be displayed, so it continues to work with RFID and NFC. It has a soft back and a lanyard which allows it to be worn around the neck.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask your distributor for more details* (subject to quantity).

Protect Your Identity
You Only Have **One.**

Phone Shield

Secure your phone from remote tracking and hacking.
Our Phone Shield will protect your device from outside interference.

Phone Shield

PS1

 10cm x 18cm	 N/A
 11.5cm x 19cm	 N/A
 25cm (Open)	 55g

A small, windowless RF Shielded Faraday bag that will isolate one mobile phone, GPS or other small electronic device.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask your distributor for more details* (subject to quantity).

Tablet Shield

Tablet Shield Small

TS1S

14cm x 24cm	N/A
17cm x 25cm	N/A
31cm (Open)	100g

The TS1 Small is a windowless bag designed to secure small tablets up to 14cmx24cm. This is roughly the size of an iPad Mini.

Tablet Shield

TS1

20cm x 26cm	N/A
22cm x 28cm	N/A
36cm (Open)	145g

A tablet-sized bag, designed to stop RF connectivity to tablets. These bags are designed to shield 2G, 3G, 4G, Bluetooth and WiFi.

Tablet Shield Large

TS1L

30cm x 40cm	N/A
32cm x 42cm	N/A
50.5cm (Open)	255g

The TS1L is a windowless bag that can secure tablets all the way up to 26cmx40cm, with a diagonal of 18 inches. This is large enough to hold the largest tablets on the market comfortably.

Tablet Shield Extra Large

TS1XL

40cm x 45cm	N/A
42cm x 47cm	N/A
57cm (Open)	385g

The TS1XL is a windowless bag, designed to carry the largest tablets as well as small notebooks. Internal dimensions are 40cmx45cm, with a diagonal of 23.7 inches.

Notebook Shield & Laptop Shield

Notebook Shield

NS1

33.5cm x 25cm	N/A
36cm x 27cm	N/A
35cm (Open)	290g

The NS1 is a Notebook Shield designed as a stylish way to carry slimline notebook computers securely. The internal size of 33.5cmx24cm is large enough to fit the Microsoft Surface Pro and Del XPS13. The bag features a comfortable carrying handle and 2 pockets on the back for holding a mouse and power supply.

Laptop Shield

LS1

43.5cm x 28cm	N/A
45.5cm x 31.5cm	N/A
41cm (Open)	335g

The LS1 is a Laptop Bag designed as a stylish way to carry laptop computers securely. The internal size of 43cmx33cm is large enough to fit a 15" laptop comfortably. The bag features a comfortable carrying handle.

Holdall Shield

Holdall Shield

HS1

 60cm x 44cm	 N/A
 62.5cm x 48cm	 N/A
 61.5cm (Open)	 630g

The HS1 is a large windowless bag, similar in size to a messenger bag. It comes with carry straps and is designed to isolate larger portable computers, or a range of devices, securely. It can carry devices up to 47cmx60cm.

Holdall Shield 3 (40 Ltr)

HS340ltr

 48cm x 32cm	 29cm
 50cm x 33cm	 30cm
 55cm (Open)	 1150g

The HS3 40ltr is a large holdall-style bag that is designed to isolate and transport a large quantity of electronic devices, or goods where there's a suspicion that tracking devices may have been discreetly installed. It has a zip top and a carrying strap and handles. The 40 ltr capacity holdall has an internal size of 45cmx31cmx28.5cm. This bag is also lockable with evidence tags.

Duffel Shield (65 Ltr)

DS4

 60cm x 35cm	 25cm
 62cm x 37cm	 29cm
 60cm (Open)	 1500g

The DS4 65ltr is a duffel-style holdall that can be used to secure a large quantity of electronics and ensure that contents can't be tracked by any devices that have been hidden within them. It has a roll-down top that secures with clips, a carrying strap and handles. The internal measurements are 60x33x32cm.

Holdall Shield 3 (80 Ltr)

HS380ltr

 67cm x 32cm	 33cm
 69cm x 34cm	 35cm
 63cm (Open)	 1740g

The HS3 80ltr is an extra-large holdall-style bag that is designed to isolate and transport a large quantity of electronic devices, or goods where there's a suspicion that tracking devices may have been discreetly installed. It has a zip top and a carrying strap and handles. The strapping on this bag can be used to carry as a Ruck Sack, as well as the traditional handle style carry. This bag is also lockable with evidence tags.

Laboratory Shields

Phone Shield Lab Edition PS2

	10cm x 22cm		N/A
	11.5cm x 24cm		N/A
	29cm (Open)		70g

The PS2 is a lab edition bag with a window designed to allow viewing of the device inside, while remaining isolated from RF signals. Perfect for forensic lab work to prevent the remote wiping of data and other outside interference.

Tablet Shield (Lab Edition) TS2

	20cm x 33.5cm		N/A
	22cm x 35.5cm		N/A
	44cm (Open)		175g

The TS2 is a lab edition bag featuring a window that allows viewing and photographing of the contents while keeping it secure from radio frequencies. It can carry tablets up to 20x26cm, with a diagonal of 32.8cm/12.9in.

Laboratory Box LB2

	32.5cm x 37cm		14cm
	35cm x 39cm		15cm
	65cm (Open)		1160g

The LB2 is a portable Faraday Laboratory Box designed to facilitate the integration of digital devices within a RF shielded environment. The LB2 features an integrated pair of RF-shielded gloves to allow easy operations of devices for intelligence gathering or digital forensic investigation. When not in use the LB2 folds down to allow for easy transport or storage. The internal size is 32.5cm x 37cm x 14cm.

Tablet Shield Large (Lab Edition) TS2L

	30cm x 38.5cm		N/A
	32cm x 41cm		N/A
	50cm (Open)		245g

The TS2L is an large lab edition Tablet Shield featuring a window that allows viewing and photographing of the contents while keeping it secure from radio frequencies. It can carry tablets up to 30x26cm with a diagonal of 15 inches.

Laboratory Box Large LB4

	42cm x 50cm		24cm
	48cm x 48cm		32cm
	68cm (Open)		2510g

The LB4 is our largest Desktop Faraday enclosure, designed to enable digital forensic analysts and technicians to attach investigation tools and equipment to a target device within a RF shielded environment for longer term operation. The operator benefits from a large viewable window enabling visibility of all devices held within the faraday enclosure. The internal size 48cm L x 48cm W with height: Front section 23cm & Rear section 31cm. When not in use the LB4 folds down to allow for easy storage.

Speciality Shields

Drone Shield

DS1

	125cm x 60cm		N/A
	80cm (Open)		N/A
			3450g

The DS1 is a Drone Shield bag that is designed to ensure captured drones are not accessed remotely to remove evidence on them before they can be examined. It can also carry large electronic devices, without any tracking or remote access. The internal size is 125x60x30cm and the bag features loops for attaching handles and straps.

Faraday Blanket

FB1

	N/A		N/A
	2m x 2m		N/A
	N/A		5.5KG

The Faraday Blanket is designed to limit radio signals. It is commonly used by TEMPEST Teams to restrict the signals during testing. Shields RF signals from mobile phones, tablet devices and laptops. Uses Disklabs 5 layer DL5LFSM material that blocks radio signals. Uses Cordura as external material and is water resistant.

Rack Shield (4U)

RS4U

	81cm x 29cm		60cm
	97cm x 30cm		64cm
	130m (Open)		3450g

The RS4U is an unbranded Rack Shield bag that features no external branding to give any indication of purpose or contents. It is designed to carry large electronic devices such as rack-format computer servers up to 4U deep securely and covertly without tracking or remote access. The internal size is 125x60x30cm and the bag features loops for attaching handles and straps.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask your distributor for more details* (subject to quantity).
