

ProDevice T1000 deflasher

The ProDevice T1000 deflasher is the world's first device that uses HEI (High Energy Impulse) technology to destroy data from media equipped with flash memory stripped of metal housing.

This is a global revolution on the data destruction market - the device solves the problem of many entrepreneurs who have so far removed data from this type of media with software (which takes a lot of time) or a data media shredder (which makes inventory and recovery of REEs from electronic media impossible).

Benefits

We guarantee safety and effectiveness – you will irretrievably remove data from flash media such as pendrives, memory cards, SSDs etc.

We promise convenience and control – the mobile application will allow you to fully control the data removal process (scanning and creating a report).

We ensure time saving and efficiency – you can delete data from the medium in about 40 seconds.

Why choose the ProDevice T1000 deflasher?

- 100% efficiency – irreversible and safe data destruction from any media equipped with flash memory stripped of metal housings.
- Permanent damage to the internal structures of the carrier.
- Data destruction without damaging the external housing of the carrier. Thanks to this, an inventory after the process is possible.
- Unique and innovative technology developed in our R&D center.
- Mobility of the device thanks to the use of industrial grade wheels.
- Patent pending.

Mobile App.

Scanning

Making reports

ProDevice Mobile App. available and included to scan the serial number of the media and generate an automatic report.

The ProDevice deflasher T1000 ensures compliance with the mandates, regulations and security guidelines

- ISO27001,
- HIPAA (Health Insurance Portability and Accountability Act),
- PIPEDA (Personal Information Protection and Electronic Documents Act),
- HMG CESG IS5.

T1000 is a perfect solution for companies and institutions that care for the highest standards related to the protection of confidential data, defined by GDPR.

The destruction of data with ProDevice deflasher T1000 is the solution to include the flash drives in the concept of circular economy. While data is securely destroyed, the carriers themselves are ready to be fully dismantled so up to 90% of the materials can be recycled.

Supported flash storage media:

- Flash memory chips,
- SSDs,
- USB drives,
- Memory cards.

HEI (High Energy Impulse) technology

Used for destruction of the internal structures of:

- Flash memory chips,
- Flash storage media.

Technical specification

| ProDevice T1000 deflasher | |
|---------------------------------------|--------------------------|
| Data destruction cycle | 40 s |
| Mobile App (barcode scanner, reports) | Yes |
| Power supply | 230V 50Hz |
| Dimensions | 720 mm x 560 mm x 465 mm |
| Maximum size of the media | 100 mm x 75 mm x 9 mm |
| Weight | 80 kg |
| Warranty | 2 years |

The manufacturer reserves the right to introduce changes to the design of devices, deemed necessary by the manufacturer to improve them.
